Introduction

The *Candidate Handbook* is intended to help you to prepare and to understand the processes and procedures for applying for licensure and for scheduling your examination(s). The South Carolina Board for Cosmetology (the “Board”) is responsible for licensing and regulating the profession of cosmetology in the State of South Carolina. The Board has contracted with Professional Credential Services (“PCS”) to provide administrative examination services. The Board, through PCS, will exclusively use the National-Interstate Council of State Boards of Cosmetology (“NIC”) examinations. PCS first requires that candidates submit an on-line Examination and License Application (“Application”). This is required to determine your eligibility for testing. Any questions regarding your application or eligibility should be directed to PCS. The State Board will have the final authority to approve the issuance of a license.

4. Successfully completed the NIC theory and practical examinations.

Training Hour Expiration

- Pursuant to South Carolina Law, all examinations must be taken and passed within 24 months of the date training was completed. *Effective January 1st 2011.*

Frequently Asked Questions

General Questions

- 1. What is NIC?**
 - NIC is the abbreviation for the National Interstate Council of State Boards of Cosmetology, Inc. NIC is the founder of national testing for cosmetology, and cosmetology related fields.
- 2. Are the NIC examinations offered in other languages?**
 - **All NIC practical examinations are administered in English.** NIC offers the written examinations in other languages as mandated by State legislation. Please refer to your state's requirements. Many states do not offer alternate languages because the students are learning in English. The pass rate on foreign language examinations is very low.
- 3. What if I do not know what a task means on the NIC practical examination?**
 - All questions and tasks are referenced to all textbooks listed in this Candidate Handbook. The information must be the same in all referenced textbooks in order for it to be used on the examination. NIC has a National Textbook Committee that works with the textbook companies to ensure the information is consistent and correct.
- 4. Will I be evaluated on technique?**

Frequently Asked Questions

Specific Nail Tech Practical Questions

1. **Is the Nail Technology practical examination performed on a mannequin hand?**

- The Nail Technology examinations are performed on a mannequin hand. Prior to reporting to the examination, candidates must apply a set of nails to the mannequin's hand. The artificial nails must cover the entire nail bed of each finger. You must provide the necessary clamp required to secure a mannequin hand to the table during the examination. Mannequin hands with digital fingers (trainer hands) are **NOT** permitted during the examination.

2. **How do I know if I have a trainer hand (mannequin hand with digital fingers)?**

- Mannequin hands with movable joints (digital fingers) are considered trainer hands and are **NOT** permitted. Please see illustration below:

3. **What can I use if I can't find a mannequin hand?**

- You can use a surgical glove filled with corn meal.

4. **Do I need a wet sanitizer for the practical examination?**

- Wet sanitizers are not necessary because candidates cannot perform proper wet disinfection at their stations as they do not have access to hot running water.

5. **How do I hold the "skin" away from the sides of the nail while filing on a mannequin?**

- You should demonstrate positioning their fingers at the sides of the nail while filing. You should not hold the finger on the top or at the knuckle as this does not protect the "skin" at the sides of the nail.

6. **What is the proper way to file the nails safely?**

- The nail file must move from outside edge to center, you should not file back and forth or cut into the corners of the nail.

7. **Do I need to use a finger bowl to soak the mannequin's fingers?**

- You must soak the mannequin's fingers, but do not have to use a finger bowl. The fingers are very stiff and will be easier to soak in a regular bowl or container.

8. **How do I hold the cuticle pusher to avoid damaging the nail plate?**

- You need to hold the cuticle pusher with a little elevation when pushing the cuticle to avoid damaging the nail plate.

Frequently Asked Questions

9. **How do I determine the proper size nail tip to apply?**

- The nail tip selected must match the width of the nail. If it is too wide you may file it to size. The nail tip cannot cover more than ½ of the nail plate. Less than ½ of the nail plate is fine.

10. **Am I required to cut the nail wrap? Can I file off excess wrap from the tip of the nail?**

- You must demonstrate cutting and trimming the wrap during the examination. You cannot file off excess wrap as it breaks the weave of the fabric.

11. **Am I required to use an “odorless” sculptured nail product?**

- You must use an odorless or low odor sculptured nail product. The product must be in the original container and it must be labeled “odorless or low odor” in English. Candidates will be instructed to open their liquid to verify that the product is “odorless or low odor”. If it is not, you will be instructed to tape the bottle shut and will not be permitted to use it. Candidates will be told to do the best they can with what they have available.

12. **Is it all right if the primer gets on the skin?**

- The primer should only be applied to the nail plate and not on the skin.

13. **How is the nail form applied?**

- The nail form must fit snug under the nail without any gaps.

14. **Does NIC specify how long the sculptured nail must be when completed?**

- You must extend the free edge to be longer than the nail that is attached.

15. **Is it all right to file on top of the sculptured nail product?**

- You must file the sculptured nail product on the top of the nail and then buff the product.

16. **Does the sculptured nail product have to be applied using a particular method?**

- You may apply product as they were taught. NIC does not evaluate technique and they do not specify one ball, two ball, etc.

17. **What will the examiners look for in the finished sculptured nail?**

- The finished nail must taper to a thin edge. The curve of the nail needs to be balanced and not flat.

18. **Do I need to recap the sculptured nail powder and liquid?**

- You must recap the powder and the liquid when they are not in use. The nail filings will contaminate the products.

19. **Can I use one bottle for the base coat and topcoat?**

- The base coat and topcoat can be the same product but it must be labeled base/top coat.
