1. **Does the mannequin have to be brand new?**
 - Candidates should **not** bring a brand new mannequin. The mannequin should be prepped prior to the examination with color or a perm to provide texture to the hair. Candidates should leave the hair long enough so that 1 inch of hair can be removed throughout the haircut and still be long enough to complete all remaining areas of the examination.
2. **Why are pre-marked mannequins not allowed?**
 - NIC does not permit pre-marked mannequins because the mannequin heads have been pre-sectioned to indicate the sections by various colors and/or notches. Pre-marked mannequins are intended for teaching purposes but are not permitted during examinations.
3. **Can I drape my mannequin during the 10 minute set up time?**
 - Candidates are given 10 minutes to set up the general supplies and to perform client protection. Your mannequin should be considered one client throughout all services but candidates must maintain their work area in a safe and sanitary manner. It is helpful to use a towel under the drape instead of a neck strip because it will stay in place better. Candidates may use one cape (fabric or plastic) throughout the entire examination but, if the cape slides down it must be re-applied. Child size capes are recommended for mannequins.
4. **Why do I need two separate bags or receptacle?**
 - One bag or receptacle must be labeled "items to be disinfected" and a second bag or receptacle must be labeled "items to be discarded"
5. **Do I need to roll the iron from base to ends while clicking during the thermal curling section of the Cosmetology examination?**
 - The Cosmetology examination does not require feeding and guiding the hair but candidates must establish a base and form a complete curl.
6. **Does the haircut need to be at a 90 degree angle and do I start in the nape section?**
 - Candidates must demonstrate elevation. NIC does not evaluate the level of elevation but it must be layered and cannot be all one length. Candidates may start the haircut in any area of the head but, most candidates start with the razor in the nape section. NIC does not evaluate candidates sectioning of the head. The only tasks that are evaluated are listed in this Candidate Handbook.
7. **Do I need a guard on my razor?**
 - Guards are not required but you must handle your razor in a safe manner at all times.
8. **Can I go back over the nape section with the shears after I have finished with the razor?**
 - After cutting the entire nape section with the razor candidates may go back over the nape section with the shears.
9. **Can I sweep my hair after completing the haircut or do I have to wait for the examiner to instruct me?**
Do I need to bring a broom and dustpan for my practical examination?
 - The examiners will instruct candidates to clean up their hair after they have checked the haircut. PCS provides brooms and dustpans.

Frequently Asked Questions

10. Should I section the head for chemical waving?

- Candidates do not have to section the head as they are only evaluated on the center back section of the head from crown to nape.

11. Do I need to use a particular size rod for chemical waving?

- NIC does not require a specific rod size but candidates must demonstrate subsections that are the same size as the rod used and the hair must be long enough to wrap around the rod at least 1 ½ times.

12. Will the examiner tell me when to demonstrate saturation and a test curl?

- The examiners instruct each candidate to demonstrate saturation and a test curl. If a candidate finishes before the time has elapsed the candidate must wait for the examiner to instruct them. If a candidate is not finished before the time has elapsed the examiner will instruct them to stop the service, demonstrate saturation and a test curl before continuing to the next section of the exam.

13. Does the examiner expect to see an “S” formation when a test curl is demonstrated?

- The examiners do not expect to see an “S” formation because a simulated product is being applied for a very short period of time. Candidates should allow the hair to relax when demonstrating a test curl and should not push the hair.

14. What product should I use to demonstrate the Predisposition/Patch Test, Hair Lightening, Hair Coloring and Chemical Relaxing?

- Candidate should use something with color like cholesterol or conditioner, etc... We recommend **not** using a clear gel.

15. Can I use the same simulated product for Predisposition/Patch Test, Hair Lightening, Hair Coloring and Chemical Relaxing?

- Candidates may use one product with a label for Patch Test and Lightener over another label that states Hair Color and then a label for Chemical Relaxing. They can remove the labels as they move from section to section without having to have multiple products or containers.

16. Can I apply the protective cream for all sections at once?

- Candidates may apply the protective cream around the hairline for all 4 sections at once.

17. Why is NIC requiring a 2 inch hair color retouch and a 2 inch relaxer retouch?

- NIC requires a 2 inch retouch to allow plenty of coverage for the examiners to evaluate without having to invade the candidate's space.

18. Will the examiner tell me to demonstrate smoothing the relaxer product?

- The examiner instructs each candidate to demonstrate smoothing the relaxer retouch product.
